

Vanguard Velo L/T Touchscreen GPS

The Vanguard Velo L/T is a new concept in GPS speed sensors.

With a 3" color touch screen and plenty of power to measure distance, acres and many other functions.

A retro screen provides basic speed and acre information

- Easy to navigate between the basic and advanced screens
- Keep track of the number of acres completed and the acres to go
- Averages acres per hour, as well as total time in the field
- Total time in field while implement is down and up, and projected time available if size of field is configured
- Can be configured per field with a manual, normally open or normally closed external lift switch
- Section control for active fields
- Trip feature, keep track of time and distance with two independent trip meters
- Day and night display modes
- Hooks direct to monitor with a 4-pin AMP connector for speed output
